Reading:  0.0005"/ 0.01mm/ inch fraction
Battery: 3V CR2032

**Height Gauge**

**Depth Gauge**

**SET ZERO**

## Operating:

- Set Zero:
    1. Set the Gauge vertically against a flat surface;
    2. Aline the Marking Wheel and Fence on the same surface
    3. Press Zero button to set zero
- Measure unit: Press Unit Switch to switch between inch, mm, or inch fractional
- Make measurement: loose the Locking Screw and slide the digital display unit until it displays the desirable value.
- Marking:  Tighten the Locking Screw at the desired position; make sure the Fence is tightly against the marking surface; slide the gauge to make marking.
- Measure Height or Depth: Set Zero (see above); make height or depth measurement depending on the application.
